

FCG is a leading solutions provider for flow control, industrial automation and life sciences with locations throughout North America.

FLOW CONTROL
GROUP

North America's Top Industrial Distribution Network for Reliable, Efficient, and Safe Power Plants

With decades of industry experience, Flow Control Group (FCG) is a trusted supplier of comprehensive solutions for power plants. Our network of brands specializes in flow control and industrial automation products and services, committed to being recognized as the foremost experts in providing engineered solutions that enhance the reliability, efficiency, and safety of power plant operations.

Why FCG?

We offer the perfect blend of local expertise and national strength. With proven experience in the power industry, we provide a comprehensive supply and service portfolio to meet all your industrial needs, ensuring reliability, efficiency, and safety.

100+

► Products & Services

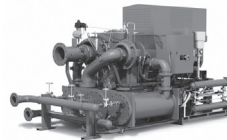

Contact us today to leverage our local expertise and national strength for your power plant's needs. Let FCG deliver reliable, efficient, and safe solutions tailored to your industry.

Valves & Actuation

- Isolation
- Control
- Safety/severe service
- Actuators

Compressors

- Air & gas compression
- Treatment (filtration, drying)
- Heat recovery
- Service programs

Filtration & Separation

- Gas (process, compressed)
- Liquid (water, oil)
- Ultrapure water treatment

Steam & Electric Heat

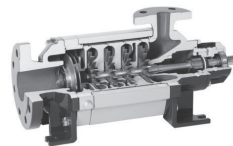

- Steam traps
- Heat exchangers and recovery
- Heat Tracing
- Thermal management

Instrumentation & Automation

- Fuel gas & emissions analyzers
- Water chemistry
- PLCs, SCADA, VFD
- Control integration
- IIOT monitoring

Pumps & Blowers

- Boiler feedwater
- Chemical feed
- Cooling water & condensate
- Repair & service

Corrosion Resistance Flow

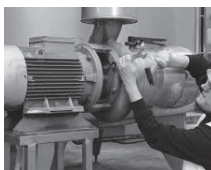

- Piping systems
- Tubing & hose fittings
- Strainers
- Plastic tank
- Plastic valves & actuators

Seals, O'rings & Specialty Materials

- Custom molded shapes
- Hose assemblies
- Gasket fabrication
- Dynamic & static seals
- O-rings
- Expansion joints

Services

- Maintenance & repair
- Reliability programs
- Asset management
- Engineering support
- Performance audits
- System optimization
